Contents

1 Introduction **7**

2 Preliminaries **11**
2.1 Generalized Lefschetz number 11
2.2 The Čech homology functor with compact carriers 12
2.3 Proper maps 12
2.4 Properties of ANR-s (AR-s) 14
2.5 Compact spaces in the Hilbert cube 16
2.6 Multivalued maps 18
2.7 Topological spaces 19

3 Multifunctions **23**
3.1 Multimorphisms 23
3.2 Homotopy of multimorphisms 30

4 Relative homotopy **35**
4.1 Families of sets of $\mathbb{D}$ type 35
4.2 Relative homotopy 37
4.3 Relative contractibility 40

5 Relative dominations **45**
5.1 Relations in the set $\mathbb{DC}(X, Y)$ 45
5.2 $\mathbb{D}$-retracts 47
5.3 Relative domination 48
5.4 Relative homotopy domination 50
5.5 Deformation $\mathbb{D}$-retracts 51
5.6 Deformation $\mathbb{V}$-retracts 54

6 Relative retracts **57**
6.1 Relative retracts 57
6.2 Properties of relative retract 59
6.3 $\mathbb{MOV}$-retracts 62
6.4 **CELL**-retracts 70
6.5 Examples of **CELL**-retracts 72
6.6 Other relative retracts 77

7 Relative extension **83**
7.1 Relative extension of continuous maps 83
7.2 Relative extension of homotopy 85

8 Multi-domination **87**
8.1 Multi-dimination of metric spaces 87
8.2 Properties of multi-domination 91

9 Fixed points and the coincidence points **97**
9.1 Fixed points of compact maps 97
9.2 Fixed points of non-compact maps 98
9.3 Coincidence points 100

10 Properties of metrizable spaces **103**
10.1 Characterization of ANR-s 103
10.2 Acyclic sets 106
10.3 Relative types of homotopy 109

11 Approximative relative retracts **111**
11.1 Approximative relative retracts 111
11.2 Properties of approximative relative retracts 114
11.3 Examples of approximative relative retracts. 116
11.4 Application of approximative relative retracts. 118

12 Multivalued maps **123**
12.1 Elementary extension of multivalued maps 123
12.2 **CELL**-admissible maps 131

13 Relative retracts in topological spaces **141**
13.1 Families of $\mathbb{D}$ type sets 141
13.2 Spaces of $NESR(ESR)$ type 144
13.3 Fixed points of compact maps 148
13.4 Fixed points of noncompact maps 149
